

The Neuroimaging for Language, Literacy and Learning (NL3) at UNL is conducting a research study using brain imaging techniques to understand the substantial individual differences in cochlear implant (CI) outcomes.

## Research Participants Wanted

- ✓ One Group: Adults who are candidates for cochlear implant
- ✓ Control Group: Adults with normal hearing
- ✓ age 20 - 60 years
- ✓ no history of neurological or psychological disorders
- ✓ Come to help us to understand the brain-based factors contributing to speech perception outcomes for cochlear implant users
- ✓ Interested?
- ✓ Email us at [nl3wanglab@gmail.com](mailto:nl3wanglab@gmail.com)
- ✓ Or Call us at 402-472-3953
- ✓ You will get compensated \$60 cash for each visit.
